As Herbert Simon wrote in Computers, Communications and the Public Interest in 1971, "What information consumes is rather obvious: it consumes the attention of its recipients. Hence a wealth of information creates a poverty of attention, and a need to allocate that attention efficiently among the overabundance of information sources that might consume it."

Amen to that,
All the major automobile manufacturers involved in this movement.
Road trip, 2 new stations
FAQ from the California Fuel Cell Partnership site
Big brother has some useful info
