I could not have said it any better Sniper_De7

Dr. Lithius wrote on Thu, 16 February 2006 12:38it takes about 29 seconds(and two reloads) for a lone Chem Sprayer to take down a Medium Tank. It takes about 44.5 seconds(and three reloads) for a lone Chem Sprayer to take down a Mammoth Tank. Also, as mentioned before, one tank of Chem Spray does 334 damage to a Heavy Armor vehicle while one Laser Chaingun..."clip"? While one Laser Chaingun "clip" does 320. Just thought I'd throw those stats out there.

Interesting, I did not know that. But even if it is true, it is still safer to shoot tanks at long range, because if you are going against people who have fast computer, they will always hit you at close range, no mater how much you dodge.
