pujols005 wrote on Wed, 08 February 2006 22:42I completely understand that. However, like I said, we all feel very bad at Fnfall servers, and would like the guy to get a second chance. He is a very respected player everywhere he goes. I know crimson feels that he/she (sorry I dont know you very well yet of course) was just doing a job, but crimson didnt look at everything. Crimson ignored how much Snip HAS DONE for renegade. He is, in my opinion, one of the best moderators out there. He has banned many, many cheaters. And even with renguard, as I have stated before, we have been overrun by cheaters lately and have had to ban a lot of people.

I will understand if he is not unbanned..but at least consider what I have said. Thank you for your time, and good night.

Well gee, I wonder why he got banned if he's a respected player everywhere he goes? oh wait, he's not...

Pujols, aren't you the faghat that was trolling #asm on EFnet? I'm pretty sure I've seen you around before. You were involved in the fruitbag/fagbag incident, go back under your bridge.

snipgod wrote on Wed, 08 February 2006 22:49but for the few that know something about renegade and how it works, they get by it easily.

it's news to me that you know ANYTHING about coding or hacking in general.

Also, I've had dealings with ECXian (or whatever lameass nick he's using today, snipgod or whatever) several times before, and have nothing to say except that my impression of him is... a 12 year old script kiddie who uses premade "hacktoolz" to impose his vigilante "justice" on anyone he dislikes or thinks is in the wrong. He has no skill whatsoever when it comes to programming and computers, but rather just reuses the same crap that every other lamer uses. He also visits (the site that must not be named) which I surfed about on for a while after he spammed the link several times in the APB IRC channel, it appears to be full of like-minded script kiddies and drooling morons who claim that pasting certain series of 0s and 1s (in ASCII, mind you, which results in a stream of 0x30 0x31 instead of anything "useful") into notepad and saving as a .EXE will result in cool "toolz".

In short, good riddance snipgod.

NOTE: I am the previous roommate Chronojam spoke of. I own the IP addresses 130.215.224.41, 130.215.224.42, and 130.215.225.33, and last year I owned two in the 130.224.228.x range (I believe one was around 30 and the other was 108, not sure.) Feel free to verify this against any logs you may have.

snipgod idiocy
If it is him then it explains alot. Please post the host of the person that is banned from that channel. I am from New Jersey and know the host of people that live around me. So please provide me with the host of the person and the irc server. If you cannot do that than i know you

are lieing. (keep in mind i want the whole host, including nickname and username.)

will do, I just need to find my logs when I get back from work.
