brushes dust off of forum account

Okay, today I reinstalled all my old C&C Games, including Red Alert 2 and Yuri's Revenge.

Anyone out there know how to get it to stop fucking crashing?

It's running on Win95 / 256 Colors (Compatibility) and I've tried Win98 too, I run it for about two minutes on skirmish then it crashes with some "Just-In-Time" debugger popping up out of nowhere with something or other.

Any help?
