All the newbs on the server, I don't think they even know that it exists... maybe you should put a memo up. Even then, it's still kind of dumb to have missiles that fly in the wrong direction.

Stealth tank and mrl missiles already home without the one that fires it seeying it. Can't you give mrl ammo to gunners though?

ok doesn't exactly work but you could at least set the whoooshing sound [/edit]
