trust me it works... only the first thing to destroy are yuris... dont kill your own tanks... one hit from a elite AT kills a Yuri... if you can react fast enough...its not the Problem...to erase this Base you need good micromanagment or a really huge army... and if you cant control your few tanks... use some spiders...their also immune to mindcontrol after killing the Yuri the Tank is under your controll.. and if you are fast enough the tank can't turn his turret to your free AT'S ... thats it..

ok if you see 10 Yuris... better use some spiders...
