Subject: FPS Issues
Posted by philzn00b on Mon, 06 Mar 2006 16:47:36 GMT

Hi every1,
my Renegade was working properly for a couple of times and now I got some FPS issues, when I just start playing the fps is a stable 60 and a couple minutes after its have difficulty to run smooth and drop at 30 and stay around it. I dont think this is due to heat, my CPU is at 27C, case at 27C and graphic cpu on the video card is under 50C.

Anyway here my setup

CPU: AMD 64 Dual-Core 3800+
MB: Abit KN8-Sli
VGA: Biostar Nvidia GeForce 6600GT<
HDD: Western Digital SATA 300gb/s 200gig
Memory: OCZ Ultra High Perfomance Dual-Channel 2X512mb
PSU: Coolmax 600W

Thanks for help.
