Hey all, I recently reinstalled Renegade (Initial Release CDs, not First Decade)plus all the patches and Renguard patches, I went to play online, bought a Artillery and tried to get into it... My character simply stuck to the vehicle for a few seconds and then was released. I tried this with other vehicles and it seems I am COMPLETELY unable to enter any vehicles online... Being forced to play infantry only in this way sucks, does anyone know whats causing this? Also, my renguard loads up fine, but its not being detected by any of the servers.
