If you have CP1 installed (or if you have changed the registry to make it think you do), RenGuard will download CP2.

IF you have neither installed (or if you have changed the registry to make it think you do), RenGuard will download CP1+CP2.

IF you have CP2 installed (or if you have changed the registry to make it think you do), RenGuard will install nothing.

Of course, if you select the option to not instal core patches, RenGuard will install nothing regardless.
