Might be a problem by removing the german always.dbs while patching the game from CP1 to CP2.

I have it in german all the way. You can get the german DBS file here=  
[http://download.renguard.com/always\\_dbs\\_german.zip](http://download.renguard.com/always_dbs_german.zip)

Corepatch 2 is buggy...

In other ways, remove ANY strings.tdb you will find in your DATA dir, this often is crappy shit and comes with many Mappacks.
