---

ok i bet ur getting sick of me

ok im waning to make a server side mod but i duno were to find things like the gdi guard tower or nod turret, also do u need a script with them?? if so how the hell do u do the script to them? (i dont have any idea)

and am i right to get the server side mod to work u put the .ldd file in the server data and delete and .thu files that match the map?

ty
