I asked for a scoped screenshot.

Cause I suspected you of the "right click" cheat.

meaning you do more damage using the right mouse button.

this cheat connected to your right mouse button

takes away your ability to scope as a sniper.

if thats your so called scoped screenshot then you got the "rgiht click" cheat.

I suspected you of the cheat. as you ripped apart 2 arties with 2 engies repairs like they were nothing

me being in one of those.
