Goztow wrote on Wed, 12 April 2006 06:50 Geforce 4 series, long time I didn't see those . That's definately the problem .

I run a GF4 Ti 4200 64MB and I don't have those issues. I play at 1024x768 with full detail and my FPS only drops down to about 30 minimum, and thats on volcano.

So, sorry, but the card isn't the issue by itself.
