2 Possible problems and solutions:

1. If this was the first time you logged in with RenGuard, the program does not recognize the nick. You have run it, log into WOL(XWIS)/GameSpy once, then quit. The next time you run RenGuard it will recognize your WOL(XWIS)/GamSpy name, and will run properly.
  2. If you have any Third Party skins/etc. in your data folder, you will not be able to join servers that have enabled RenGuard's "Pure" mode. Note that the skins will not register as a cheat in a RenGuarded server, but it won't let you join a server that requires that you have no Third Party skins/etc.
