So like There is RA, then 2 expansions: Counterstrike and Aftermath. I take it the three of them didn't make it under any other name in europe or on PSX. But if my retaliation is a PSX version of RA on PC, then what about my RA for PSX? still it seems I'm missing some to call my collection complete and not to mention I would really want to play these games. That's why I'm afraid I would have to buy that 1st decade pack. #*ù\$\$ EA(Endlesly Annoying)
