A quick word of advice:

Never fly a plane on Vicadin!

Even in a videogame. I had surgery and had to stay in bed for a week once. They gave me Vicadin for pain but failed to warn me of its true power. I took a hit and loaded up Ace Combat 4. I can't remember too much of what happened, but I 'awoke' to the sounds of a frantic air-traffic-control officer screaming at me. I couldn't tell which way was up, and flew right through the tower.
