I use a custom arrangement with Renegade because I am left handed.

Here is what I use:

forward kp5  
Back kp2  
move left kp1  
Move right kp3  
turn left kp4  
turn right kp6  
jump kp enter  
spin kp +  
action kp7  
next weapon kp 8  
reload kp 9

When I have CP2 installed, I can't use kp5,kp2,kp1,kp3. I am stuck in place. When I use the default configuration, it works fine

I reformatted my HD and reinstalled XP Pro (did it twice within 3 weeks), put in renegade and it played fine. I put in RG and have the problem. Take out RG and no problem. I have no skins installed

My patches are all up to date. RG use to work fine about 2 months ago, then 1 day this problem happened. Any ideas?

Thanks in advance,

Joe
