Well, the commands don't work. The only working ones are !mods, !showmods, !rules, and !showrules (also I can login). I use night regulator. I have SSAOW 1.5, and when I use !kill [random person's name] It'll say that he has been killed, but he really wasn't killed. !killme doesn't work. !0wn doesn't work. And so does all the other commands. This is the log:
