I forgot to say, that I know what the problem is, but I don't know how to fix it.

I noticed that when I use the !help thing, the command box says

> "ppage 1 [NR] Hello, Your Current Available Commands Are: !version; !showversion; !setjoin; !viewjoin; !rec; !n00b; !tp; !next; !killme; !nextnext; !mods; !rules; !website; !e-mail; !donate; !votnextmap; !time;" is not a command. To send a message, use "msg" and "amsg"

For a list of available commands, use the "help" command !

For a list of available commands, use the "help" command !

I noticed when it says "ppage is not a command". Normally it is for corepatch. I have corepatch 2.2. So I tried to copy it to the fds folder. But where?
