Just make sure that if XWIS bans for Renegade are put in place, that the cheater was not on a server which specifically allows bullshit to be done, or that has various "unfair" server-side mods in use. I know of two such servers. It would be a shame if some unknowing person happens into one of those servers and gets one of the regulars banned from XWIS for something the regular knew was allowed on that server, and that the new guy knew wasn't allowed in other servers.
