Question,
would there be a way to allow voice or IP, for ingame users?
Which would mean the servers themselves would also be running a ts server, owuld it be
possible?

Yes, that's called multitasking.

Ok, if yes lets see you run ts on your server. And what I mean by server, is the renegade fds or
server side mod, could loadup an extra app, which would run the TS or w/e server, on the
fds/ssm, so when you connect to the server, you autoconnect to the ts server aswell.
Comments anyone?
