Hi,

I have a problem.... I have Renguard, but it always disconnects becuase of this.

[16:50] Trying to connect to server #1...Connected
[16:50] Secure link established.
[16:50] Welcome to RenGuard , shkkf!
[16:50] To launch Renegade, please click 'Renegade'.
[16:50] Bad/Corrupted file data\always.dbs has been found in your renegade directory
[16:50] Bad/Corrupted file data\Always2.dat has been found in your renegade directory
[16:50] Disconnected from RenGuard network

Now, I have tried uninstalling it and reinstalling it! Even uninstalled renguard and reinstalled it. removed the corrupt files and everything. But it still happens! It drives me nuts. Since even when I get to play then the host evicts me since they think I'm cheating!!!

I was wondering does someone know how to make shure this doesn't happen? Since it really is driving me crazy.

Sincerely shkkf
