Quite remarkable discovery indeed...some early reports are indicating that it can even speak! It's on the record as saying such things as "It's not a skin it's a texture, tards" and "No, it's not a tunnel...it's a hallway". For this, it is being named the "Yeti of Correction" Anthropologists are calling it the "HomoEgomaniacian".

"Yeah it was a frustrating bugger, always correcting even the slightest falacy in your speech."
John Asshat said.

More info to come on this amazing discovery.
