Subject: join my own server.
Posted by lookitzhiep on Tue, 30 May 2006 23:07:51 GMT

Um, a bit new to running a server.

I wanted to run a Co-Op server for me and my brother so I downloaded the Renegade FDS. I've installed it, it sets up, etc. The server is on the listing but whenever I try and start up Renegade, it won't load up. It will only run if I close the FDS program.

Help?
