no one of my disks got stuck on the tray, when i tryed to pull it out, the disk snaped, and it scratched my mother board, but it was a crappy windows 98 pc what i baught 2nd hand (btw i got it from some pc place were they fix or start from scratch on a pc) , but it had warrinty on it, so they gave me a new pc, then i baught new-er pc , sounds strange but i loved windows 98, for its DOS, but i needed XP to play some of my favorite games.
