what you can try(only on public server) is to harvy walk with..... a stank.
i've done it on a public server with a bunch of noobs and i was behind wf=>reff=>pp
bye the time they reached pp i've c4'd (wa a tech) it and it was gone then they were all saying wth
how? and then i started hitting reff and wf.
you have o be realy careful to stay at the right position behind the harvy but it's possible
(i know it's a noob thing to play on publics but it's a good training)
