Merovingian wrote on Fri, 02 June 2006 19:08if i get high ping i usually press f8 and type "sbbo 1500500" and it sorts it. some servers tell you to do this but this is to my knowlage...

Yes but that only works if you can actually take in that much bandwith, so you need broadband.

Meroving, please think of the other players. When you play with your 56K on a big server, you warp from one place to another on their screens. You yourself must have pings of 300-400.

I understand you just want to play the game but I can really only advice you to play in smaller games.
