First thing I noticed are the adds in your first screen... Which is a good thing for the ppl that paid for those I guess. But seeying those adds gives me a feeling adding your site to that button is a good way to up your hit count and incomes, which is probebly the main reason you guys want this.

Now, offcourse we would get a nicer ladder in return which costs money too, but speaking for myself, if i wanted 'fancy' I wouldn't be playing Renegade. Besides most people that actually want to play on your ladder know where to find the site anyway, so putting it under an in-game button wouldn't add much for people anyway.

Not that I ever play on XWIS or look at the ladder but there is also the matter of ingame rankings. How do you think you are going to link your site to the actual gameservers and ingame ranks? Correct me if I am wrong, but I think they are working on a way to get the rankings back to work on XWIS. If there is going to be a ranked site under that button I think this site needs to be a representation of the ingame ranks.
