Guys watch out if you play here. Even when on Rengaurd it seems that mods don't like being killed. Kill one mod and you get banned. What a pro server.

Probably only had about 6 kills, was in an aryl defending the base the whole time on complex. Was about 3rd/50 ish, thanks to n00b players, not PW, just attacking tanks and the odd people that pop up at the hole in the wall to Wep factory. Killed a mod and got banned, in an instant. Imao, must have some utterly crap mods,

Quality server....

Guess the moral of the story goes, stick to know quality servers .
