kooljason wrote on Sat, 10 June 2006 19:58okay,

Can someone please tell me how i make maps selectable when i use a .pkg mod package?

I made my mod then i extracted it as "test1.pkg" and when i went ingame and went to map select there was no maps there   please help me

If your using level edit you have to save the map you made into your mod folder then extract it as a .pkg.
