im sorry 2 say this but renegade will be dead in the next 6 months, u can buy it 4 12\$ and most stores dont even have it. it is also being overrun by n00bs and faggot hackers with cheats, and EA will probably stop online service 4 but i dont know about that. why doesnt anyone like Planetside anyway u never give anything new a chance, i think it will be as good as renegade if not better. Planetside has fixed the flaws that renegade made

1. u can now talk 2 your squad memebres without downloading teamspeak which very few people have.

2.better graphics

3.more vehicles

4.large areas 2 fight on unlike renegades small maps

5.better online service

6.The sides are more even unlike Nod and GDI
