---

Ok, this virus is BAD!

I am trying to install a new version on Norton I got cuz my old one is 3 years out of date...

This virus won't let me delete vsman.exe which is making it IMPOSSIBLE to install the new software.

I think the virus is doing something it says its file size is 0?

I can't delete it because it says "sharing violation" or w/r u know...

PLEASE HELP!!!!

MY DAD AND I HAVE TRYIND EVERYTHING!!!

I can't boot in safe mode because when I get to that screen it just locks up... nothin happens... it just sits there and I have to restart the computer...

Reformatting is NOT an option as I don't have the windows CD anymore and a new copy is too expensive for me or my dad.

THIS VIRUS SUCKS FUCKIN ASS BECAUSE IT IS WHATS MAKING RENEGADE NOT WORK I REALLY WANT TO PLAY DAMMIT!
