I don't think the reinstall issues are due to Renguard. I'd say the install has problems reading from the CD? Did you delete the complete directory after uninstalling as the patches may have left some files.

If you install in the directory without TM and it still doesn't work, you can try to run this: <http://www.renegadeforums.com/index.php?t=msg&th=19368&a mp;a mp;start=0&rid=4882> and give in your renegade serial again.

We are all waiting for the next version of Renguard for a while now, it's being hard tested. Most of us are aware of the many problems with the current version and we'll try to get them solved for you too.
