He Quotes

Quote:Where is HTMLGOD? What happened to SWMOD?
IS everyone hearing? a lot of that lately.
I'll tell: life finally caught up with
me. My grades were bad at college were good
but not I was spending almost all my free
time alone, my computer, this mod. But
Now summer after a semester divided between
schoolwork, all the other things that decorate
my life, Aside for sleep, I've been having a
hard time with anything done. When I got back from
college at second semester, I slept continuously
for 2 days in my load for a new hope
next year, and daily to complete my instrument rating
pilot's license. With my summer-school physics covering
chapter for a day 4 to 6 hours moving to the
airport, the way that used to be just plain isn't there any more.

So, after much deliberation,
I've reached a conclusion about
SWMOD. I don't have the time much as I would like to,
and it's a part of my life that I need to
get passed their backs on me in
times of need, and cut this great mod short
of it's potential. When the work by one of my long-standing
get that I didn't touch the beta or
even a computer for a full just no reason for me
to go on - my limited extend as far as
texturing, and not really any further. That leaves
us with what we had about a month ago, a decent
internal about 10 characters,
some weapons, some vehicles, and various other
tidbits. I've never release. Stay tuned.
