He means rom drive. "Green disc and the Red disc"

Kamuix wrote on Mon, 26 June 2006 19:56 I've had this problem before, usually its because your CD had too many smudge marks on it. In my cases anyway. When that error comes up, take out you're CD and wash it with water than dry it and put it back into the CDrom and hit retry.

That has always worked for me, hope it helps
