Ok, I finally made the map I was trying to make.

It is a DM style map that I plan to play with my friends, so I added bots to give it a war-like feel. I probably went overboard...

Anyways, anyone want to give it a look and offer any suggestions?

(Also, is there a way to prevent the level file from loading every single object? It takes about 5 minutes to load because of all the bots...)

That is where my stuff is, please comment

This is my first Renegade map, so please excuse the C&C_Under landscape. I don't know how to make land yet...
