Xtrm2Matt

Your the one to talk eh?

Yes I am. I have no need to raise my post count, and I have never spammed, having a post count higher then you doesn't equal spam, this is what some of you ignorant little children need to learn. His post was nothing but SPAM, very little to do with the topic.

Xtrm2MattIf you want to post something negative about some, theres a function called "Private Messages", maybe you should give it a go someday?

Maybe you should go back and actually read this thread? But that would be asking WAY too much. :rolleyes: Since when is stating that his reply was merely spam and nothing else, and that there is no reason why php-nuke 'sucks'
