```
bool find_new_text(string &line)
{
    string st;
    string day, mon, year;
    get_date(day, mon, year);
    st.assign("ssaow_"+mon+"-"+day+"-"+year+".txt");
    ifstream file;
    file.open(st.c_str(), ios::in);
    char buf[50];
    if(file.is_open())
    {
        file.getline(buf, 50);
        line.assign(buf);
        file.close();
        if(remove(line.c_str()) == -1)
            {
                cout << "could not delete"; //Changed this
            }
        return 1;
    }
    else
    {
        return 0;
    }
    return 0;
}

void pre_parse()
{
    string find;
    while(1)
    {
        if(find_new_text(find))
        {
            parse(find);
            find.clear();
        }
    }
}

void parse(string line)
{
    stringstream str;
```

```
int f = 11;
    if(!line.empty()) // added this
    {
        while(f != line.size())
        {
            strs << line[f++];
        }
    }
cout << endl << strs.str();
}
```

it works now, i will be posting code next week i hope!
