Here are some old models I made for a RA2 mod that was canceled.

Incase you dont know what some things are...

1. Soviet Battlelab
2. Allied Barx
3. Allied Battlelab
4. Allied Grizzly Tank
5. Soviet Sentry Turret
6. PPK (dunno for who)
7. Soviet Flak Cannon
8. Allied Tank Destroyer (France I think)
9. PPSH (think this is the weapon for the Soviet "grunts")

Let me know if you would like them. Some (if not all) models are over 2 years old, meshes are decent, no UV unwraps on any (I dont think).
