ok i've been havin a big problem with ssaow. i did remove it for some point and just had my serverside mods in place but i've decided to go back to it and try to fix it.

basically some times the server crashes when mines/beacons have been placed, an attempt at disarming them have been made but they have then gone of and blown up a building. when the building blows up the server restarts. Only happens when a failed attempt to disarm it has been made and it only happens when i have ssaow 1.5 in place. I've tried reinstalling it so its not a faulty install.

any ideas much appreciated.  
thanks buffymaniack
