Subject: Re: Possibility of NR for linux!
Posted by danpaul88 on Mon, 24 Jul 2006 18:02:50 GMT

Some linux versions have a GUI, some have an optional GUI, but they are mainly ones for desktop use, the ones used as servers won't have the GUI installed to keep the overhead down.

I have this machine dual-booting with linux, although I rarely use it because it does not support my wireless card fully, so I can't get on the net with it, which sucks...
