Read the first post in that thread then download the attached file.

Use it with the Renegade serial that came with TFD, and everything should work fine.

If that doesn't work, you'll need to contact Strike Team at www.strike-team.net, or EA technical support with proof of purchase to get a new serial.

Another note: TFD comes with renegade already patched up to 1.037, so there is no need to download/install any patches.
