Subject: Re: new fds bot, c++ php, perl
Posted by jnz on Sat, 29 Jul 2006 16:23:00 GMT

i admit, i don't like VB at all. a tryed to learn it, but in so used to the syntax of perl, php, c++, javascript, python that i cannot learn it. i have tryed many times.

the bot that i am making has come to a halt because i cannot get scripts.dll to WORK! no one will help me with it. im going to move over to cygwin if it has the windows.h header.
