Nice work,

Are you using photoshop, illustrator maybe for the colouring?

I personally have never done any anime stuff but from looking at the anime style here...

<http://www.animecubed.com/titlepics/Anime.jpg>

The girls leg in the bottom left it only has 3 colours dependant on the light levels there are also either smooth curves or jagged lines between the colour changes.

Personally if it was my first time colouring this sort of thing I'd find some work that was very similar to what I was doing so I could see how light and colour is represented in a similar scene.

good luck with the colouring, Have fun!
