<http://www.redzero.demon.co.uk/moonhoax/SELENE.htm> Unfortunately it won't put an end to the hoax theories, that we can guarantee. Here's what the theories will be couple of years time. Yes, they're that predictable.

\* The Japanese have been paid off by NASA to fake their photos. Well, we all know they're shifty foreigners with no morals, don't we? They'll do anything for the mighty dollar.

\* NASA sneaked faked landers up there during the last five years in preparation for the Japanese photos. Don't bother asking about where the money came from to do this, or how they managed it all in total secrecy.

\* What we can see aren't the Apollo sites, but alien bases that NASA are pretending are theirs. And if you join up all the dots on the photos it spells out a Masonic chant in ancient Greek.
