I guess you guys haven't noticed but he has just been completely ignoring anything anyone says that pokes holes in his (obviously) fabricated story.

Why would I give you any information about myself. Keep asking your never going to get it so drop it. I don't need to prove shit to you or anyone on this pretty damn stupid forum. I know where I work....my GF knows where I work... GOD himself knows where I work... so, your judgement means nothing. You think if you keep hounding me for it I'll be stupid enough to give it out. Sorry but, it didn't WORK wittle kiddie but, nice try.

I'm not really refering to the requests for personal information.

... I guess Black-Cell has been shut down by EA by now, eh?

What's really funny is that I get the impression that you found out how to namehack and decided you were a leet haxor. "I got your IP using Renegade IP." Ha ha. Surely you realize how stupid you look when you say things like that.
