light wrote on Sat, 05 August 2006 01:51Disclaimer: I have no idea what deleting the Administrator account will do, it may screw your PC, you have been warned.

Start -> Run lusrmgr.msc

(May not work on home, but will work on Pro)

Or you could use something like TweakUI to login a specific user.

He said the account AFTER you create the Administrator account at least twice. Pay attention.
