danpaul88 wrote on Sun, 06 August 2006 07:06 what, actually works effectively, or filters one or two words? I always thought it did nothing...

The filter built inside Renegade works on most words I would think, though I havent gone though every single swear word I know, lol, but it covers words like fuck and such.. so I guess it would cover more.

I always forgot to turn it off when I re-install renny.
