isnt there a rule to say you are *NOT* allowed to advertise?

that is a shit design, it is hard to spot the links at the top because of the addverts, addverts why on a site that is barly used, i have 3 sites up and i don't need to addvertize they cost p-nuts. 3 domain names, 16-gig space total at £100 year.

oh yeah, the html is sloppy, making the thing take a while to load. not to mention it is not portable.

GET A DOMAIN NAME, they cose like £2 a year. and a server £60 a year!

nice grafix [j_ball430](#) i like <http://www.deviantart.com/deviation/16508307/>
