So we're supposed to believe palestinian propaganda about how wrong Israeli propaganda is?

Most of this video is saying that it's unbelievable that life as usual shouldn't continue in a warzone.

Where is the proof for the "filters"? It just says it as fact and asks a few random people.

"I'm professor of being biased at ISRAEL UNIVERSITY. Notice that? I'm from Israel so when I badmouth Israel its fact. The palestinians have done nothing but shower Israel with gifts but Israel keeps specially targetting babies with smart bombs. The American people need to open their eyes and discover that their democratic government is being eroded! It's not Anti-Semitism. The fact is the jews need to be killed, so Palastine can stretch its legs. Remember I'm a college professor in ISRAEL no less, so that's all true. Even without any proof."
